

Finish: Anthracite

Read these instructions before commencing installation & retain them for future reference.

IP65   **240V 14W**

Important Information

It is recommended that luminaires are installed by a qualified electrician. The installation of this product must comply with the current edition of the IEE wiring regulations BS7671. These products are designed for connection to a 240V 50Hz supply. Any damaged parts should be replaced as soon as possible. KSR will not accept responsibility for any claims arising from a poor installation.

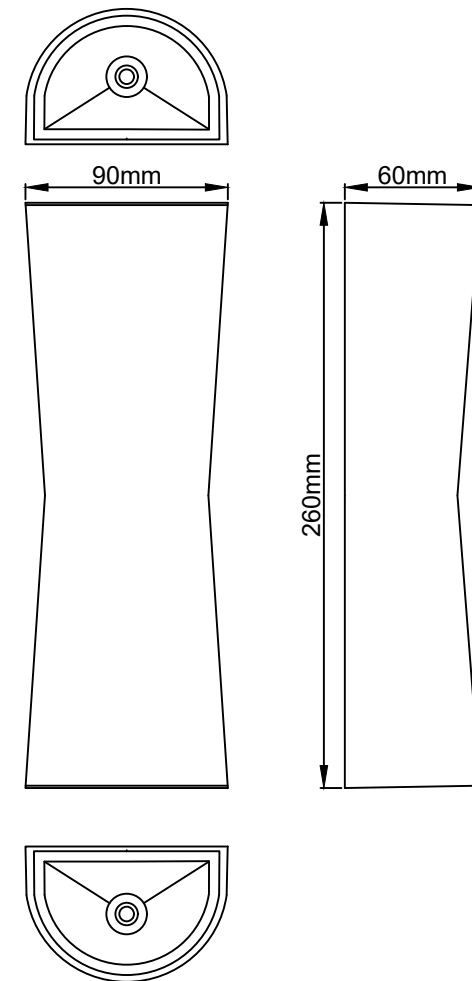

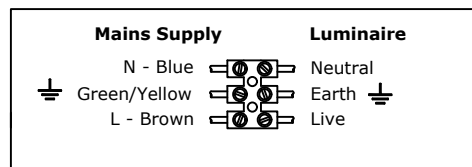

Important User Advice

Always safely isolate the mains supply before installation or servicing.

Installation Details

Safely isolate the mains supply.
 Remove the two screws from the sides of the wall light holding the back plate to the front cover and retain.
 Secure the back plate to a suitable surface.
 Remove the 4 screws from the terminal cover and retain.
 Pass the mains supply cable through the grommet.
 This luminaire is not suitable for looping through.
 Connect the mains supply to the terminal block following the marking on the block and/or the guide in Fig.1 as below.
 Reinstall the terminal cover and fix using the 4 screws (KSR recommends using a suitable water repellent grease on the screws) ensuring the seal is intact and undamaged.
 Dress the cable and fix the luminaire to the mounting bracket securing with the two last retained screws (KSR recommends using a suitable water repellent grease on the screws).
 Switch on the mains supply and test.
